

## TEHRAN PUPPET MAKING WORKSHOP

2nd - 6th Sept. 2012

The workshop sessions are aimed at providing methodologies for designing and creating a manipulable puppet suitable for animation.

During the five days workshop, participants will be exposed to different exercises based on a multi disciplinary approach in order to redefine their style for puppet design.

Participants will be also invited to research and explore with different material and techniques to strengthen their knowledge in puppet making and be able to create their own character.

By the end of the workshop, we will be bringing the puppets to life through a sneak peek into the stop motion world.
